BEARTOOTH HIGHWAY

HAER WY-92

(Red Lodge - Cooke City Highway)

(Red Lodge - Cooke City Approach Road)

(U.S. Highway 212)

(WY Forest Highway 4)

Red Lodge, Montana to Cooke City, Montana

Cody vicinity

Park County

Wyoming

INDEX TO BLACK AND WHITE PHOTOGRAPHS

David Killam, photographer, 2004

- | | |
|---------|--|
| WY-92-1 | View of the highway, from near the west end of the Beartooth Ravine, looking east. The proposed realignment will be to the south (right) of the existing alignment and also require the removal of the rock knob seen at the center of the photo |
| WY-92-2 | View of the highway, from the middle of the Beartooth Ravine, looking east. Proposed bridge and realignment will extend across the ravine rather than curve to the north (left) as the road currently does |
| WY-92-3 | View of the highway, from near the middle of the Beartooth Ravine. The proposed realignment will shift the road slightly to the south (right) and will be built using retaining walls |
| WY-92-4 | View of the highway, from the east end of the Beartooth Ravine, looking west, showing the east end of the proposed realignment that will shift the road to the south (left) and will be built using retaining walls |
| WY-92-5 | View of the lower portion of the highway, from the east end of the Beartooth Ravine, looking west, showing retained alignment |

BEARTOOTH HIGHWAY
HAER WY-92
INDEX TO PHOTOGRAPHS
(Page 2)

WY-92-6	View of the highway, from just east of its crossing of the Beartooth Lake, looking northeast, showing retained alignment
WY-92-7	View of the highway, from west to the Top of the World Store, looking east. The proposed realignment would extend to the south (right) of the existing alignment
WY-92-8	View of the highway, from east of the Top of the World Store, looking west towards Beartooth Butte. The proposed realignment would be to the north (right) of the existing alignment
WY-92-9	View of the highway, from east of the Top of the World Store, looking east. The proposed realignment would be to the north (left) of the existing alignment
WY-92-10	View of the highway, from east of the Top of the World Store, looking west towards Beartooth Butte. New alignment will be situated to the north (right) of the existing road. This section of the existing road will be obliterated and reclaimed
WY-92-11	View of the highway crossing Little Bear Lake Fen, looking northeast. The fen bridge will be installed on the existing alignment
WY-92-12	View of the highway, looking west towards Little Bear Lake Fen where the fen bridge will be installed on the existing alignment
WY-92-13	View of the highway, west of Long Lake, looking west, showing retained curve alignment
WY-92-14	View of the highway, from just west of Long Lake, looking northeast, showing retained alignment
WY-92-15	View of the highway, from its crossing of Long Lake (at left), looking northeast, showing retained alignment
WY-92-16	View of the highway and Long Lake, looking southwest, showing retained alignment
WY-92-17	View of the highway, from the switchbacks above Long Lake (in background), looking southwest, showing the general setting and retained alignment

BEARTOOTH HIGHWAY
HAER WY-92
INDEX TO PHOTOGRAPHS
(Page 3)

WY-92-18	View of the highway, from the switchbacks above Frozen Lake (in midground), looking southwest, showing the general setting and retained switchback alignments
WY-92-19	View of the highway, approach to the Frozen Lake switchback curve, looking east. Proposed realignment will shift the road slightly to the south (right)
WY-92-20	View of the highway, at the Frozen Lake switchback curve, looking northwest. The proposed realignment would be just to the southeast (right) of the existing alignment
WY-92-21	View of the highway, from just north of the frozen Lake switchback, looking northwest, showing the retained alignment
WY-92-22	View of the highway, west end of the switchbacks, looking northwest, showing retained alignment
WY-92-23	View of the highway, from above the switchbacks, looking southwest, showing the setting and retained alignment. Long Lake in right background
WY-92-24	View of the highway, from above the switchbacks, looking southwest, showing the setting and retained alignment. Long Lake in right background
WY-92-25	View of the highway, from above the switchbacks between Frozen Lake and Bar Drift, looking south, showing the setting and retained alignment
WY-92-26	View of the highway, from the top of the switchbacks between Frozen Lake and Bar Drift, looking northwest, showing the upper switchback curve and retained alignment
WY-92-27	View of the highway, lower west summit switchbacks between Frozen Lake and Bar Drift, looking northwest, showing retained alignment
WY-92-28	View of the highway, from above the switchbacks between Frozen Lake and Bar Drift, looking northeast, showing the retained alignment across the Beartooth Plateau

BEARTOOTH HIGHWAY
HAER WY-92
INDEX TO PHOTOGRAPHS
(Page 4)

WY-92-29	View of the highway, from above the switchbacks between Frozen Lake and Bar Drift, looking northeast, showing the retained alignment across the Beartooth Plateau
WY-92-30	View of the highway, from the east end of the Bar Drift curve, looking west, showing retained alignment
WY-92-31	View of the highway, from the east end of the Bar Drift curve, looking west, showing retained alignment and area of proposed parking area in foreground
WY-92-32	View of the highway, from the east end of the Albright curve, looking west. The proposed realignment would occur in the midground, smoothing out the existing sharp curve
WY-92-33	Detail view of Feature 1, culvert headwall, from the north side, looking south, at the west end of the project area
WY-92-34	Detail view of Feature 2, culvert headwall, from the north side, looking south, near the west end of the project area
WY-92-35	Detail view of Feature 3, culvert headwall, from the south side, looking north, near the west end of the project area
WY-92-36	Detail view of culvert headwall (no feature number assigned), from the south side, looking north, near the west end of the project area. Culvert is located approximately 2000 feet east of Feature 2
WY-92-37	Detail view of culvert headwall (no feature number assigned), from the south side, looking north, near the west end of the project area. Culvert is located approximately 1000 feet east of Feature 1
WY-92-38	Detail view of culvert headwall, from the south side, looking north, east of Little Bear Creek Bridge #2
